

Peace Harbor Medical Center Outpatient Infusion Service Request

Phone: (541) 902-6019 Fax: (541) 902-1649

Thank you for selecting our infusion services team to care for your patient. If you are not a PeaceHealth provider, all information listed below is required before we can process orders and schedule your patient for treatment. Part A- Patient scheduling and contact information: Patient Name (Last, First): _______Date of Birth: _____ Patient Contact Information and Phone Number (s): Ordering Provider Name (Print): Provider Clinic or Service Address: ______ Clinic or Service Phone Number: _____ Clinic or Service Fax Number: _____ Diagnosis (include ICD 10 codes): Medication and Service Requested- list J-Code/ CPT code if known: ______ Date Service is Requested to Begin: ______ Date Service is Expected to End: ___ Order will expire 1 year from date of provider signature unless "date service is expected to end" is earlier. <u>Part B- Insurance and Prior Authorization.</u> Any non-PeaceHealth provider must obtain prior authorization prior to service. Attach a copy of authorization documentation received from insurance payer when submitting orders. Insurance (Payer) Company: Prior Authorization Number and Conditions: Prior Authorization Expiration Date: _____ Insurance (Payer) Contact Phone Number: <u>Part C-</u> Elements needed to guide medication therapy are included with request for service: All orders and instruction (please use the PeaceHealth approved ordering form) are complete and include provider signature AND printed name at the bottom of each order page. Check the boxes of ALL orders you would like to activate. For blood products, PeaceHealth Blood and Transfusion Consent form is signed and dated by the provider and the patient. If information is located outside of PeaceHealth's electronic medical record system attach the following: A list of current medications reconciled by patient provider is available and includes a list of known allergies. Recent progress notes from ordering provider. A copy of relevant laboratory results and other appropriate supporting documentation. **IMPORTANT MESSAGE TO PROVIDERS:** To reduce delays in treatment and phone calls to your office you may participate in the PHMC formulary process by signing this document. A clinical pharmacist will adjust orders according to PHMC approved policies and procedures. I agree to utilize PHMC policies & procedures that have been reviewed by the Pharmacy & Therapeutics Committee and authorized by the Medical Executive Committee of PHMC. This agreement will be issued for the duration of active orders contained within this treatment plan.

InFLIXimab and Biosimilars Outpatient Infusion Therapy Plan Initiation and Maintenance

Patient Identification Label

Heading	<u>rrders</u> Are Initiated by Default Unless Crossed Out by Practitioner. All <u>Boxed Orders</u> Require Practitioner Check to be Initiated. Content		
For Admission to			
Service	 Provider has screened patient for history of chronic infection, heart failure, seizure disorder, liver disease, tuberculosis, blood dyscrasias, hepatitis B infection, or malignancy prior to initiation of inFLIXimab therapy. <i>Date of screening:</i> Provide patient with the FDA approved medication guide for inFLIXimab. 		
Supportive Care	Select One:		
	☐ InFLIXimab-dyyb (Inflectra) IV infusion; or		
	☐ InFLIXimab (Remicade) IV infusion; or		
	☐ InFLIXimab-abda (Renflexis) IV infusion		
	Select Dose (Dose will be rounded to nearest vial size):		
	<u>Weight-based Dose</u> Non <u>Weight-based Dose</u>		
	☐ 5 mg/kg ☐ mg (indicate dose)		
	☐ mg/kg (indicate dose)		
	Select Frequency:		
	For new patients beginning infliximab therapy:		
	☐ Initiation regimen administered at 0, 2 and 6 weeks <i>followed by</i> maintenance infusion every 8 weeks		
	☐ Initiation regimen administered at 0, 2 and 6 weeks <i>followed by</i> maintenance infusion everyweeks		
	For established patients on maintenance therapy:		
	☐ Maintenance infusion every 8 weeks		
	☐ Maintenance infusion every weeks (indicate frequency)		
	Additional order instruction:		
	☐ Use an in-line, sterile, non-pyrogenic, low protein-binding filter with 1.2-micron pore size or less.		
	Begin inFLIXimab infusion at 10 mL/hr and increase rate per the following schedule:		
	INFUSION RATE SCHEDULE		
	Time Infusion Rate		
	(minutes) 0 Initiate at 10 mL/hr x 15 min		
	15 Increase to 20 mL/hr x 15 min		
	30 Increase to 40 mL/hr x 15 min		
	45 Increase to 80 mL/hr x 15 min		
	60 Increase to 150 mL/hr x 15 min		
	90 Increase to 250 mL/hr until done

Progress & Orders

InFLIXimab and Biosimilars Outpatient Infusion Therapy Plan Initiation and Maintenance

Heading	Content
Heading Nursing Orders	Content ☐ For new patients beginning infliximab therapy:
ivaising Orders	 Prior to starting inFLIXimab therapy ensure patient has had a recent PPD. If positive PPD and
	patient has not received isoniazid therapy, consult with physician regarding initiation of
	isoniazid therapy.
	• Infusions #1-4: Vitals prior to infusion, before each rate increase, 30 minutes following infusion.
	Observe patient 30 minutes after completion of infusion.
	 For ongoing maintenance therapy: Infusion # 5-8: vitals prior to infusion, 30 minutes after initiation, at end of infusion, and 30
	minutes following infusion. Observe patient 30 minutes after completion of infusion.
	 Infusion #9: vitals prior to infusion, at end of infusion, and 30 minutes following infusion.
	Observe patient 30 minutes after completion of infusion.
	 Infusion #10 & beyond: vitals prior to infusion and end of infusion. No observation required
	upon completion of infusion.,
Labs	☐ CBC with automated differential once prior to starting treatment.
	CBC with automated differential every weeks
	☐ Comprehensive metabolic panel once prior to starting treatment.
	Comprehensive metabolic panel every weeks
	Must wait for lab results to start infusion, OR
	☐ May proceed with infusion while waiting for lab results
	☐ Treatment lab instructions – Provider approves to release and draw labs 2 days pre and post this
Nursing IV	planned treatment date. Select the most appropriate option below:
Access and	
	☐ Insert PERIPHERAL IV as needed and flush (unless provider selects option for a central line).
Maintenance	M Sodium chlorida 0.9% (NS) fluch 10 ml. IV once as needed for line care
iviaintenance	Sodium chloride 0.9% (NS) flush 10 mL IV once as needed for line care. □ 1
Maintenance	☐ Access and use NON-PICC Central Line/CVAD
Maintenance	 ☐ Access and use NON-PICC Central Line/CVAD ☑ Initiate Central Line (non-PICC) maintenance protocol.
Maintenance	 □ Access and use NON-PICC Central Line/CVAD ☑ Initiate Central Line (non-PICC) maintenance protocol. ☑ Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, before and after medication
Maintenance	 □ Access and use NON-PICC Central Line/CVAD ☑ Initiate Central Line (non-PICC) maintenance protocol. ☑ Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, before and after medication administration, at discharge, and at de-access (sterile NS for Port-a-Cath access)
Maintenance	 Access and use NON-PICC Central Line/CVAD ☑ Initiate Central Line (non-PICC) maintenance protocol. ☑ Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, before and after medication administration, at discharge, and at de-access (sterile NS for Port-a-Cath access) ☑ Sodium chloride 0.9% (NS) flush 20 mL IV as needed for line care post lab draw.
Maintenance	 Access and use NON-PICC Central Line/CVAD ☑ Initiate Central Line (non-PICC) maintenance protocol. ☑ Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, before and after medication administration, at discharge, and at de-access (sterile NS for Port-a-Cath access) ☑ Sodium chloride 0.9% (NS) flush 20 mL IV as needed for line care post lab draw. ☑ Heparin, porcine (PF) 100 unit/mL flush 5 mL IV as needed for line care, for de-access.
Maintenance	 Access and use NON-PICC Central Line/CVAD ☑ Initiate Central Line (non-PICC) maintenance protocol. ☑ Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, before and after medication administration, at discharge, and at de-access (sterile NS for Port-a-Cath access) ☑ Sodium chloride 0.9% (NS) flush 20 mL IV as needed for line care post lab draw. ☑ Heparin, porcine (PF) 100 unit/mL flush 5 mL IV as needed for line care, for de-access. ☐ Alteplase (Cathflo) injection 2 mg intra-catheter as needed for occluded central line catheters-
Maintenance	 Access and use NON-PICC Central Line/CVAD ☑ Initiate Central Line (non-PICC) maintenance protocol. ☑ Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, before and after medication administration, at discharge, and at de-access (sterile NS for Port-a-Cath access) ☑ Sodium chloride 0.9% (NS) flush 20 mL IV as needed for line care post lab draw. ☑ Heparin, porcine (PF) 100 unit/mL flush 5 mL IV as needed for line care, for de-access. ☐ Alteplase (Cathflo) injection 2 mg intra-catheter as needed for occluded central line catheters-For clearing central line catheter. Add 2.2 mL sterile water for injection to vial; let the vial stand
Maintenance	 □ Access and use NON-PICC Central Line/CVAD ☑ Initiate Central Line (non-PICC) maintenance protocol. ☑ Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, before and after medication administration, at discharge, and at de-access (sterile NS for Port-a-Cath access) ☑ Sodium chloride 0.9% (NS) flush 20 mL IV as needed for line care post lab draw. ☑ Heparin, porcine (PF) 100 unit/mL flush 5 mL IV as needed for line care, for de-access. □ Alteplase (Cathflo) injection 2 mg intra-catheter as needed for occluded central line catheters-For clearing central line catheter. Add 2.2 mL sterile water for injection to vial; let the vial stand undisturbed to allow large bubbles to dissipate. Mix by gently swirling until completely dissolved
Maintenance	 Access and use NON-PICC Central Line/CVAD ☑ Initiate Central Line (non-PICC) maintenance protocol. ☑ Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, before and after medication administration, at discharge, and at de-access (sterile NS for Port-a-Cath access) ☑ Sodium chloride 0.9% (NS) flush 20 mL IV as needed for line care post lab draw. ☑ Heparin, porcine (PF) 100 unit/mL flush 5 mL IV as needed for line care, for de-access. ☐ Alteplase (Cathflo) injection 2 mg intra-catheter as needed for occluded central line catheters-For clearing central line catheter. Progress & Orders

InFLIXimab and Biosimilars Outpatient Infusion Therapy Plan Initiation and Maintenance

All Pre-Selected Boxed Orders Are Initiated by Default Unless Crossed Out by Practitioner. All Boxed Orders Require Practitioner Check to be Initiated.

Heading	Content	
	☐ Alteplase (Cathflo) injection 2 mg intra-catheter as needed for occluded central line catheters-	
	For clearing central line catheter. Add 2.2 mL sterile water for injection to vial; let the vial stand undisturbed to allow large bubbles to dissipate. Mix by gently swirling until completely dissolved	
	(complete dissolution should occur within 3 minutes); do not shake. Final concentration:	
	1mg/mL. Retain in catheter for 30 minutes to 2 hours; may instill a second dose if occluded.	
As Needed	Standard As Needed Medications:	
Medications	Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care.	
	Sodium chloride 0.9% 500 mL continuous infusion at 25 mL/hour IV as needed for therapy	
	administration (i.e., blood products, chemotherapy, potassium administration).	
Pre-	☐ Acetaminophen (Tylenol) 650 mg PO once on arrival	
Medications	☐ DiphenhydrAMINE (Benadryl) 25 mg PO once on arrival, OR	
	☐ Loratadine (Claritin) 10 mg PO once on arrival	
	☐ MethylPREDNISolone sodium succinate (Solu-MEDROL) 40 mg IV once on arrival	
Emergency	If patient has symptoms of anaphylaxis (wheezing, dyspnea, hypotension, angioedema, chest pain, or	
Medications	tongue swelling), discontinue infusion and initiate standard emergency response procedures.	
	Standard Emergency Medications:	
	☑ DiphenhydrAMINE (Benadryl) injection 25-50 mg IV once as needed for mild to moderate drug	
	reactions (flushing, dizziness, headache, diaphoresis, fever, palpitations, chest discomfort, blood	
	pressure changes (>/= 20 points in SBP), nausea, urticaria, chills, pruritis)	
	Administer 50 mg IV if patient has NOT had diphenhydramine within 2 hours of reaction	
	 Administer 25 mg IV if patient has had diphenhydramine within 2 hours of reaction, if reaction doesn't resolve in 3 minutes may repeat 25 mg IV dose for a total of 50 mg and contact provider. 	
	☐ Albuterol 90 mcg/actuation inhaler 2 puffs once as needed for wheezing, shortness of breath	
	associated with infusion reaction and contact provider.	
	dizziness, headache, diaphoresis, fever, palpitations, chest discomfort plus blood pressure changes (>/= 40 points in SBP), shortness of breath with wheezing and 02 Sat < 90% and contact provider.
