Peace Harbor Medical Center Outpatient Infusion Service Request<br>Phone: (541) 902-6019 Fax: (541) 902-1649

Thank you for selecting our infusion services team to care for your patient. If you are not a PeaceHealth provider, all information listed below is required before we can process orders and schedule your patient for treatment.

## Part A- Patient scheduling and contact information:

Patient Name (Last, First): $\qquad$ Date of Birth: $\qquad$
Patient Contact Information and Phone Number (s): $\qquad$
Ordering Provider Name (Print): $\qquad$
Provider Clinic or Service Address: $\qquad$
Clinic or Service Phone Number: $\qquad$ Clinic or Service Fax Number: $\qquad$
Diagnosis (include ICD 10 codes): $\qquad$
Medication and Service Requested-list J-Code/ CPT code if known: $\qquad$
Date Service is Requested to Begin: $\qquad$ Date Service is Expected to End: $\qquad$
Order will expire 1 year from date of provider signature unless "date service is expected to end" is earlier.
Part B-Insurance and Prior Authorization. Any non-PeaceHealth provider must obtain prior authorization prior to service. Attach a copy of authorization documentation received from insurance payer when submitting orders.

Insurance (Payer) Company: $\qquad$
Prior Authorization Number and Conditions: $\qquad$
Prior Authorization Expiration Date: $\qquad$ Insurance (Payer) Contact Phone Number: $\qquad$

## Part C- Elements needed to guide medication therapy are included with request for service:

$\square$ All orders and instruction (please use the PeaceHealth approved ordering form) are complete and include provider signature AND printed name at the bottom of each order page. Check the boxes of ALL orders you would like to activate.
$\square$ For blood products, PeaceHealth Blood and Transfusion Consent form is signed and dated by the provider and the patient.
If information is located outside of PeaceHealth's electronic medical record system attach the following:
$\square$ A list of current medications reconciled by patient provider is available and includes a list of known allergies.Recent progress notes from ordering provider.
$\square$ A copy of relevant laboratory results and other appropriate supporting documentation.
IMPORTANT MESSAGE TO PROVIDERS: To reduce delays in treatment and phone calls to your office you may participate in the PHMC formulary process by signing this document. A clinical pharmacist will adjust orders according to PHMC approved policies and procedures.

I agree to utilize PHMC policies \& procedures that have been reviewed by the Pharmacy \& Therapeutics Committee and authorized by the Medical Executive Committee of PHMC. This agreement will be issued for the duration of active orders contained within this treatment plan.
$\qquad$ DATE: $\qquad$ TIME:

## FAX completed service request and completed orders to: PHMC OP Infusion and Nursing Services 541-902-1649

# Vedolizumab (ENTYVIO) Outpatient Infusion Therapy Plan 

All Pre-Selected Boxed Orders Are Initiated by Default Unless Crossed Out by Practitioner. All Boxed Orders Require Practitioner Check to be Initiated.

\begin{tabular}{|c|c|}
\hline Heading \& Content \\
\hline For Admission to Service \& \begin{tabular}{l}
Provider Instruction- review information below and address requirements for admission to service: \\
1. Provider has verified that patient is up to date with all immunizations and screened patient for history of chronic infection and/or liver disease prior to initiation of vedolizumab therapy. \\
2. Provide patient with the FDA approved medication guide for vedolizumab (Entyvio).
\end{tabular} \\
\hline Labs \& \begin{tabular}{l}
CBC with automated differential once prior to beginning treatment and every \(\qquad\) weeks. \\
Comprehensive metabolic panel once prior to beginning treatment and every \(\qquad\) weeks.
C-reactive protein (CRP) once prior to beginning treatment and every \(\qquad\) weeks.
Sedimentation rate (ESR) once prior to beginning treatment and every \(\qquad\) weeks.
Must wait for lab results to start infusion, OR
May proceed with infusion while waiting for lab results.
Instructions - Provider approves to release and draw labs 2 days pre and post treatment date.
\end{tabular} \\
\hline Supportive Care \& \begin{tabular}{l}
Vedolizumab (Entyvio) IV infusion: \\
Select Dose:
300 mg in NS 250 ml over 30 minutes

$\qquad$ mg (indicate dose) <br>
Select Frequency:
Initial doses administered at 0,2 and 6 weeks followed by a maintenance infusion every 8 weeks
Maintenance infusion every 8 weeks
Maintenance infusion every $\qquad$ weeks (indicate frequency) <br>
Additional order instruction: <br>
After infusion is complete, flush with 30 mL of sterile $0.9 \%$ sodium chloride.
\end{tabular} <br>

\hline Nursing Orders \& Hold infusion and contact provider for signs of infection or if patient presents with jaundice or other evidence of significant liver injury such as fatigue, anorexia, right abdominal pain, or dark urine. Assess vital signs before and after infusion. Patient may be discharged 15 minutes post-infusion if there is no evidence of adverse reaction and vital signs are stable. <br>

\hline Nursing IV Access and Maintenance \& | Select the most appropriate option below: |
| :--- |
| $\boxtimes$ Insert PERIPHERAL IV as needed and flush (unless provider selects option for a central line). |
| Sodium chloride $0.9 \%$ (NS) flush 10 mL IV once as needed for line care |
| Access and use NON-PICC Central Line/CVAD |
| Initiate Central Line (non-PICC) maintenance protocol |
| Sodium chloride $0.9 \%$ (NS) flush 10 mL IV as needed for line care, before and after medication administration, at discharge, and at de-access (sterile NS for Port-a-Cath access) Sodium chloride $0.9 \%$ (NS) flush 20 mL IV as needed for line care post lab draw. Heparin, porcine (PF) 100 unit/mL flush 5 mL IV as needed for line care, for de-access Alteplase (Cathflo) injection 2 mg intra-catheter as needed for occluded central line cathetersFor clearing central line catheter. Add 2.2 mL sterile water for injection to vial; let the vial stand undisturbed to allow large bubbles to dissipate. Mix by gently swirling until completely dissolved (complete dissolution should occur within 3 minutes); do not shake. Final concentration: $1 \mathrm{mg} / \mathrm{mL}$. Retain in catheter for 30 minutes to 2 hours; may instill a second dose if occluded. |
| Access and use PICC Central Line/CVAD | <br>

\hline
