

## Peace Harbor Medical Center Outpatient Infusion Service Request

Phone: (541) 902-6019 Fax: (541) 902-1649

Thank you for selecting our infusion services team to care for your patient. If you are not a PeaceHealth provider, all information listed below is required before we can process orders and schedule your patient for treatment. Part A- Patient scheduling and contact information: Patient Name (Last, First): \_\_\_\_\_\_\_Date of Birth: \_\_\_\_\_ Patient Contact Information and Phone Number (s): Ordering Provider Name (Print): Provider Clinic or Service Address: \_\_\_\_\_\_ Clinic or Service Phone Number: \_\_\_\_\_ Clinic or Service Fax Number: \_\_\_\_\_ Diagnosis (include ICD 10 codes): Medication and Service Requested- list J-Code/ CPT code if known: \_\_\_\_\_\_ Date Service is Requested to Begin: \_\_\_\_\_\_ Date Service is Expected to End: \_\_\_ Order will expire 1 year from date of provider signature unless "date service is expected to end" is earlier. <u>Part B- Insurance and Prior Authorization.</u> Any non-PeaceHealth provider must obtain prior authorization prior to service. Attach a copy of authorization documentation received from insurance payer when submitting orders. Insurance (Payer) Company: Prior Authorization Number and Conditions: Prior Authorization Expiration Date: \_\_\_\_\_ Insurance (Payer) Contact Phone Number: <u>Part C-</u> Elements needed to guide medication therapy are included with request for service: All orders and instruction (please use the PeaceHealth approved ordering form) are complete and include provider signature AND printed name at the bottom of each order page. Check the boxes of ALL orders you would like to activate. For blood products, PeaceHealth Blood and Transfusion Consent form is signed and dated by the provider and the patient. If information is located outside of PeaceHealth's electronic medical record system attach the following: A list of current medications reconciled by patient provider is available and includes a list of known allergies. Recent progress notes from ordering provider. A copy of relevant laboratory results and other appropriate supporting documentation. **IMPORTANT MESSAGE TO PROVIDERS:** To reduce delays in treatment and phone calls to your office you may participate in the PHMC formulary process by signing this document. A clinical pharmacist will adjust orders according to PHMC approved policies and procedures. I agree to utilize PHMC policies & procedures that have been reviewed by the Pharmacy & Therapeutics Committee and authorized by the Medical Executive Committee of PHMC. This agreement will be issued for the duration of active orders contained within this treatment plan.

Progress & Orders

## **Zolendronic Acid (RECLAST) Outpatient Infusion Therapy Plan**

All Pre-Selected Boxed Orders Are Initiated by Default Unless Crossed Out by Practitioner. All Boxed Orders Require Practitioner Check to be Initiated.

Heading	Content				
For Admission to	<b>Provider Instruction</b> – Please review information below as requirements for admission to service:				
Service	1. Instruct patient to complete dental exam and preventative dentistry prior to infusion if				
	patient is at risk for osteonecrosis.				
	2. Instruct patient to report any signs and symptoms of atypical femur fracture, musculoskeletal				
	pain, and signs of ocular inflammation after receiving Reclast.				
	3. Provide patient with the FDA approved medication guide for Reclast.				
Labs	☐ CMP within 30-days prior to treatment				
	☐ Magnesium within 30-days prior to treatment				
	☐ Phosphorous within 30-days prior to treatment				
	☐ CBC with automated differential within 30-days prior to treatment				
	☐ Treatment lab instructions – may release and draw labs within 30 days prior to treatment				
Supportive Care					
Nursing Orders	☐ Nursing communication – Treatment will be withheld for patients with creatinine clearance less				
	than 35 mL/min. Contact ordering provider.				
	☑ Nursing communication – Treatment will be withheld for patients with hypocalcemia pending				
	repletion. Pharmacist may calculate corrected calcium as needed in patients with both				
	hypocalcemia and hypoalbuminemia to confirm calcium is within normal range. Contact pharmacist				
	for corrected calcium level. Contact ordering provider if corrected calcium is less than 8.5.				
Nursing IV Access	Select the most appropriate option below:				
and Maintenance	☐ Insert PERIPHERAL IV as needed and flush (unless provider selects option for a central line).				
	Sodium chloride 0.9% (NS) flush 10 mL IV once as needed for line care.				
	☐ Access and use NON-PICC Central Line/CVAD				
	☑ Initiate Central Line (non-PICC) maintenance protocol.				
	☑ Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, before and after medication				
	administration, at discharge, and at de-access (sterile NS for Port-a-Cath access)				
	☐ Sodium chloride 0.9% (NS) flush 20 mL IV as needed for line care post lab draw.				
	☐ Alteplase (Cathflo) injection 2 mg intra-catheter as needed for occluded central line catheters-				
	For clearing central line catheter. Add 2.2 mL sterile water for injection to vial; let the vial stand				
	undisturbed to allow large bubbles to dissipate. Mix by gently swirling until completely				
	dissolved (complete dissolution should occur within 3 minutes); do not shake. Final				
	concentration: 1mg/mL. Retain in catheter for 30 minutes to 2 hours; may instill a second dose				
	if occluded.				
	☐ Access and use PICC Central Line/CVAD				
	☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐				
	☐ Change PICC line dressing weekly and as needed.				
	Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, and before and after     Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, and before and after     Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, and before and after     Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, and before and after     Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, and before and after     Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, and before and after     Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, and before and after     Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, and before and after     Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, and before and after     Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, and before and after the line care the line ca				
	medication administration.				
	Sodium chloride 0.9% (NS) flush 20 mL IV as needed for line care post lab draw
