# Outpatient Infusion Service Request

Phone: (541) 902-6019 Fax: (541) 902-1649

Thank you for selecting our infusion services team to care for your patient. If you are not a PeaceHealth provider, all information listed below is required before we can process orders and schedule your patient for treatment.

**Part A- Patient scheduling and contact information:**

Patient Name (Last, First): _____Date of Birth: _____

Patient Contact Information and Phone Number (s): _____

Ordering Provider Name (Print): _____

Provider Clinic or Service Address: _____

Clinic or Service Phone Number: _____ Clinic or Service Fax Number: _____

Diagnosis (include ICD 10 codes): _____

Medication and Service Requested- list J-Code/ CPT code if known: _____

**Date Service is Requested to Begin**: _____ **Date Service is Expected to End**: _____

*Order will expire 1 year from date of provider signature unless "date service is expected to end" is earlier.*

**Part B- Insurance and Prior Authorization.** Any non-PeaceHealth provider must obtain prior authorization prior to service. *Attach a copy of authorization documentation received from insurance payer when submitting orders.*

Insurance (Payer) Company: _____

Prior Authorization Number and Conditions: _____

Prior Authorization Expiration Date: _____

Insurance (Payer) Contact Phone Number: _____

**Part C- Elements needed to guide medication therapy are included with request for service:**

☐ All orders and instruction (please use the PeaceHealth approved ordering form) are complete and include provider signature AND printed name at the bottom of each order page. Check the boxes of ALL orders you would like to activate.

☐ For blood products, PeaceHealth Blood and Transfusion Consent form is signed and dated by the provider and the patient.

**If information is located outside of PeaceHealth's electronic medical record system attach the following:**

☐ A list of current medications reconciled by patient provider is available and includes a list of known allergies.

☐ Recent progress notes from ordering provider.

☐ A copy of relevant laboratory results and other appropriate supporting documentation.

**IMPORTANT MESSAGE TO PROVIDERS:** To reduce delays in treatment and phone calls to your office you may participate in the PHMC formulary process by signing this document. A clinical pharmacist will adjust orders according to PHMC approved policies and procedures.

> *I agree to utilize PHMC policies & procedures that have been reviewed by the Pharmacy & Therapeutics Committee and authorized by the Medical Executive Committee of PHMC. This agreement will be issued for the duration of active orders contained within this treatment plan.*

**PROVIDER SIGNATURE: _____ DATE: _____ TIME:_____**

**FAX completed service request and completed orders to: PHMC OP Infusion and Nursing Services 541-902-1649**

**All Pre-Selected Boxed Orders Are Initiated by Default Unless Crossed Out by Practitioner. All Boxed Orders Require Practitioner Check to be Initiated.**

| Heading | Content |
|---|---|
| **Supportive Care** | **Treatment of calciphylaxis:**<br>☒ **Sodium Thiosulfate** in NS 100 ml IV infusion over 60 minutes:<br><br>**Select Dose**:<br>☐ 25 g<br>☐ 12.5 g (Less than 60 kg or patients who can't tolerate 25 g dose)<br><br>**Select Frequency**:<br>☐ Three times weekly<br>☐ _____ (indicate frequency) |
| **Labs** | ☒ CMP once prior to beginning treatment and every _____ (indicate frequency)<br>☒ Treatment lab instructions – Provider approves to release and draw labs 2 days pre and post this planned treatment date. |
| **Nursing Orders** | ☒ Nursing communication – Treatment will be withheld for patients with hypocalcemia pending repletion. Pharmacist may calculate corrected calcium in patients with both hypocalcemia and hypoalbuminemia to confirm calcium is within normal range. Contact pharmacist for corrected calcium level. Contact ordering physician if corrected calcium is less than 8.5 mg/dL.<br>☒ Hold sodium thiosulfate for CO2 less than 18 mmol/L. Contact provider.<br>☒ Hold sodium thiosulfate for anion gap greater than 12 mmol/L. Contact provider.<br>☒ Patient may experience hypotension during infusion. Ensure patient is in a reclined or semi-reclined position during infusion. |
| **Nursing IV Access and Maintenance** | Select the most appropriate option below:<br>☒ Insert PERIPHERAL IV as needed and flush (unless provider selects option for a central line).<br>☒ Sodium chloride 0.9% (NS) flush 10 mL IV once as needed for line care.<br><br>☐ Access and use NON-PICC Central Line/CVAD<br>☒ Initiate Central Line (non-PICC) maintenance protocol.<br>☒ Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, before and after medication administration, at discharge, and at de-access (sterile NS for Port-a-Cath access)<br>☒ Sodium chloride 0.9% (NS) flush 20 mL IV as needed for line care post lab draw.<br>☒ Heparin, porcine (PF) 100 unit/mL flush 5 mL IV as needed for line care, for de-access.<br>☐ Alteplase (Cathflo) injection 2 mg intra-catheter as needed for occluded central line catheters- For clearing central line catheter. Add 2.2 mL sterile water for injection to vial; let the vial stand undisturbed to allow large bubbles to dissipate. Mix by gently swirling until completely dissolved (complete dissolution should occur within 3 minutes); do not shake. Final concentration: 1mg/mL. Retain in catheter for 30 minutes to 2 hours; may instill a second dose if occluded.<br><br>☐ Access and use PICC Central Line/CVAD<br>☒ Initiate PICC maintenance protocol.<br>☒ Change PICC line dressing weekly and as needed.<br>☒ Sodium chloride 0.9% (NS) flush 10 mL IV as needed for line care, and before and after medication administration. |

**Practitioner Signature: _____Date of Order: _____Time: _____**

*Final page of orders must include signature of the ordering practitioner, date, and time.*
