

2022-2025 Community Health Improvement Plan

PeaceHealth Sacred Heart Medical Center at University District

The PeaceHealth Sacred Heart Medical Center at University District Community Collaboration Committee supports collaborations that improve community health for all. We recognize that health outcomes are often driven by social factors, such as access to food or housing, the health of the environment, or economic well-being. Structural injustice, especially systemic racism, is woven into the fabric of our community. The outcome is unjust systems that are designed to leave some out and privilege others. Each strategy undertaken during the 2022-2025 Community Health Improvement cycle is directed at working toward equity, anti-racism and the elimination of those health inequities in our community.

Initiatives	Desired Outcomes	Owner	Partner(s)	Timeline
 Home
