

If your patient needs an outpatient interventional radiology procedure performed at Riverbend, in the cath lab, this tip sheet outlines how to start that workflow.

Please note, some procedures done by our interventional radiology colleagues are performed as imaging procedures. If a procedure comes up as an imaging order, you do not need to also order a cath lab order.

From within any Epic ambulatory encounter, type 'Case request' as an order. If this option doesn't come up, be sure you look under 'Facility List.' Open the Case Request Cath Lab Services order.

Selections within the Case Request order

Once you open the case request order, you will make a few selections.

- Under location, select 'RBMC Cath Lab'
- Leave date blank
- Patient Class: select 'Hospital Outpatient Surgery'
- Under Panel 1, Add provider: CASEMD, GENERIC
- Under Panel 1, add procedure: type in the name of the procedure your patient needs.
 - Once the procedure is added in this line, a new box will populate with several pre-filled or optional fields. For most procedures, a procedure name and CPT code will prepopulate.
 - If you are prompted to select a procedure name / CPT code, please select the procedure that seems most likely to be correct.
 - Please be sure that a CPT code is listed – if a CPT code does not populate, there will be a delay in scheduling.
 - Anesthesia will default to Nurse Procedural Sedation, leave as is.
 - In the comments box, enter any relevant information, such as, 'discussed with Dr. Isuani' or 'exchange of existing nephrostomy tube.'

Selections within the Case Request order (continued)

The screenshot shows the 'Case Request Cath Lab Services' form in Epic. The form includes fields for Location (RBMC Cath Lab), Date, Patient Class (Inpatient, Emergency, Hospital Outpatient Surgery, Surgery Admit), and a panel for adding providers and procedures. Below the panel are fields for Referral, Performing Department, Priority (Routine, STAT), Class (Ancillary Performed, Clinic Performed), Phase of Care, Special needs, Self pay this visit?, Release results to patient (Immediate release, Hold for 7 days), Comments, Lab, Resulting Agency, Collection Date, and Collection Time. The form has 'Accept' and 'Cancel' buttons at the top and bottom right, and a 'Next Required' button at the bottom left.

Associate diagnoses per normal and sign your order.

Centralized Scheduling will contact the patient to schedule.

What if my patient has an urgent need?

If your patient needs a procedure done urgently and does not need to be admitted to the hospital, please do order as priority STAT, and CALL the OIC radiology consult line, 541-284-4016 during normal business hours to discuss with one of the interventional radiologists. After hours, if you need to reach an interventional radiologist, please call Access PeaceHealth to be connected. You or your staff will also need to call Centralized Scheduling 541-222-8765 to arrange an urgent time.

What if I don't know what to order?

CALL the OIC radiology consult line, 541-284-4016 during normal business hours to discuss the patient with one of the interventional radiologists.
