

Peace Harbor Medical Center Outpatient Infusion Service Request

Phone: (541) 902-6019 Fax: (541) 902-1649

Thank you for selecting our infusion services team to care for your patient. Please provide ALL information listed below to ensure that we can process orders and schedule your patient for treatment without delay.

Part A- Patient scheduling and contact information: Patient Name (Last, First): _______Date of Birth: ______ Patient Contact Information and Phone Number (s): Ordering Provider Name (Print): Provider Clinic or Service Address: Clinic or Service Phone Number: ______ Clinic or Service Fax Number: ______ Diagnosis (include ICD 10 codes): Medication and Service Requested- list J-Code/ CPT code if known: ______ Date Service is Requested to Begin: ______ Date Service is Expected to End: ____ Order will expire 1 year from date of provider signature unless "date service is expected to end" is earlier. Part B- Insurance and Prior Authorization. Any non-PeaceHealth provider must obtain prior authorization prior to service. Attach a copy of authorization documentation received from insurance payer when submitting orders. Insurance (Payer) Company: Prior Authorization Number and Conditions: Prior Authorization Expiration Date: Insurance (Payer) Contact Phone Number: Part C- Elements needed to guide medication therapy are included with request for service: Orders and instruction (use the PeaceHealth approved ordering form if you are not a PeaceHealth provider) are complete and include provider signature at the bottom of each page. Check the boxes of ALL orders you would like to activate. For blood products, PeaceHealth Blood and Transfusion Consent form is signed and dated by the provider and the patient. If information is located outside of PeaceHealth's electronic medical record system attach the following: A list of current medications reconciled by patient provider is available and includes a list of known allergies. Recent progress notes from ordering provider. A copy of relevant laboratory results and other appropriate supporting documentation. IMPORTANT MESSAGE TO PROVIDERS: To reduce delays in treatment and added phone calls, you may participate to utilize PeaceHealth preferred medication formulary options by signing this document. A clinical pharmacist will adjust orders to align with PeaceHealth medical staff approved medication formulary options, policies, and procedures. I agree to utilize PeaceHealth preferred medication formulary options, policies and procedures that have been authorized by PeaceHealth Medical Staff. This agreement will be issued for the duration of active orders contained within this treatment plan. PROVIDER SIGNATURE: _____ DATE: _____ TIME:____

Progress & Orders

Sodium Thiosulfate Outpatient Infusion Therapy Plan

All Pre-Selected Boxed Orders Are Initiated by Default Unless Crossed Out by Practitioner. All Boxed Orders Require Practitioner Check to be Initiated.

Heading	Content						
Supportive Care	Treatment of calciphylaxis:						
	☑ Sodium thiosulfate IV infusion over 30 minutes (infuse over time may be slowed to 60 minutes for						
	patients experiencing nausea or vomiting):						
	Select Dose:						
	□ 25 g						
	☐ 12.5 g (Less than 60 kg or patients who can't tolerate 25 g dose)						
	12.3 g (Less than 60 kg of patients who can't tolerate 23 g dose)						
	Select Frequency:						
	☐ Three times weekly						
	(indicate frequency)						
Labs	☐ CMP once prior to beginning treatment and every (indicate frequency)						
Nursing Orders	☑ Nursing communication – Treatment will be withheld for patients with hypocalcemia pending						
	repletion. Pharmacist may calculate corrected calcium in patients with both hypocalcemia and						
	hypoalbuminemia to confirm calcium is within normal range. Contact pharmacist for corrected						
	calcium level. Contact ordering physician if corrected calcium is less than 8.5 mg/dL.						
	☐ Hold sodium thiosulfate for CO2 less than 18 mmol/L. Contact provider.						
	⋈ Hold sodium thiosulfate for anion gap greater than 12 mmol/L. Contact provider.						
	☐ Patient may experience hypotension during infusion. Ensure patient is in a reclined or semi-reclined						
	position during infusion.						
Nursing IV Access	Select the most appropriate option below:						
and Maintenance							
	☑ Sodium chloride 0.9% (NS) flush 10 mL IV once as needed for line care						
	☐ Access and use NON-PICC Central Line/CVAD as needed and confirm patency						
	☑ Sodium chloride 0.9% (NS) injection 10 mL IV as needed for line care before and after						
	medication administration, at discharge, and at de-access						
	☑ Sodium chloride 0.9% (NS) injection 20 mL IV once as needed for line care post lab draw						
	☑ Alteplase (Cathflo) injection 2 mg intra-catheter as needed for clearing central line catheter.						
	Reconstitute with 2.2 mL sterile water for injection to the vial; let the vial stand undisturbed to						
	allow large bubbles to dissipate. Mix by gently swirling until completely dissolved (complete						
	dissolution should occur within 3 minutes); do not shake. Final concentration: 1mg/mL. Instill						
	medication in non-functional lumen. Do not use lumen while dwelling. Allow to dwell 30						
	minutes and check for patency by drawing back on lumen for blood return. If line is still not						
	patent, allow medication to dwell an additional 90 minutes. Dwell time not to exceed 120						
	minutes. Use second dose of Alteplase (Cathflo) if catheter not patent after 120 minutes. If the						
	catheter is functional, aspirate and waste the medication and residual clot prior to flushing the						
	line.
