

## Peace Harbor Medical Center Outpatient Infusion Service Request

Phone: (541) 902-6019 Fax: (541) 902-1649

Thank you for selecting our infusion services team to care for your patient. Please provide ALL information listed below to ensure that we can process orders and schedule your patient for treatment without delay.

## Part A- Patient scheduling and contact information: Patient Name (Last, First): \_\_\_\_\_\_\_Date of Birth: \_\_\_\_\_\_ Patient Contact Information and Phone Number (s): Ordering Provider Name (Print): Provider Clinic or Service Address: Clinic or Service Phone Number: \_\_\_\_\_\_ Clinic or Service Fax Number: \_\_\_\_\_\_ Diagnosis (include ICD 10 codes): Medication and Service Requested- list J-Code/ CPT code if known: \_\_\_\_\_\_ Date Service is Requested to Begin: \_\_\_\_\_\_ Date Service is Expected to End: \_\_\_\_ Order will expire 1 year from date of provider signature unless "date service is expected to end" is earlier. Part B- Insurance and Prior Authorization. Any non-PeaceHealth provider must obtain prior authorization prior to service. Attach a copy of authorization documentation received from insurance payer when submitting orders. Insurance (Payer) Company: Prior Authorization Number and Conditions: Prior Authorization Expiration Date: Insurance (Payer) Contact Phone Number: Part C- Elements needed to guide medication therapy are included with request for service: Orders and instruction (use the PeaceHealth approved ordering form if you are not a PeaceHealth provider) are complete and include provider signature at the bottom of each page. Check the boxes of ALL orders you would like to activate. For blood products, PeaceHealth Blood and Transfusion Consent form is signed and dated by the provider and the patient. If information is located outside of PeaceHealth's electronic medical record system attach the following: A list of current medications reconciled by patient provider is available and includes a list of known allergies. Recent progress notes from ordering provider. A copy of relevant laboratory results and other appropriate supporting documentation. IMPORTANT MESSAGE TO PROVIDERS: To reduce delays in treatment and added phone calls, you may participate to utilize PeaceHealth preferred medication formulary options by signing this document. A clinical pharmacist will adjust orders to align with PeaceHealth medical staff approved medication formulary options, policies, and procedures. I agree to utilize PeaceHealth preferred medication formulary options, policies and procedures that have been authorized by PeaceHealth Medical Staff. This agreement will be issued for the duration of active orders contained within this treatment plan. PROVIDER SIGNATURE: \_\_\_\_\_ DATE: \_\_\_\_\_ TIME:\_\_\_\_

Progress & Orders

## Risankizumab-rzaa (Skyrizi) Outpatient Infusion Therapy Plan

All Pre-Selected Boxed Orders Are Initiated by Default Unless Crossed Out by Practitioner. All Boxed Orders Require Practitioner Check to be Initiated.

Heading	Content		
For Admission to	Provider Instruction – Please review and address requirements for admission to service:		
Service	Prescribing information recommends screening for latent infections. Provider has reviewed		
	recommendations, completed screening per their discretion, and deems patient fit for start of		
	therapy. Prescriber will monitor labs for medication induced hepatotoxicity and contact patient		
	and infusion center if therapy should be held for abnormal labs values.		
Supportive Care	☐ Risankizumab-rzaa (Skyrizi) IV infusion every 28 days for 3 doses		
	Select Dose:		
	☐ 600 mg infused over at least one hour (Crohn's disease dosing)		
	☐ 1200 mg infused over at least two hours (Ulcerative colitis dosing)		
	Additional order instruction:		
	□ Complete infusion within 4 hours of dilution		
Labs	☐ CBC with automated differential once prior to starting treatment and every weeks		
	☐ Comprehensive metabolic panel once prior to starting treatment and every weeks		
Nursing Orders	☐ Hold and contact provider for signs of active infection.		
	☐ Assess patient's vital signs prior to the infusion, and every 30 minutes during infusion.		
Nursing IV Access	Select the most appropriate option below:		
and Maintenance			
	☑ Sodium chloride 0.9% (NS) flush 10 mL IV once as needed for line care		
	☐ Access and use NON-PICC Central Line/CVAD as needed and confirm patency		
	☑ Initiate Central Line (Non-PICC) maintenance protocol		
	medication administration, at discharge, and at de-access		
	☐ Sodium chloride 0.9% (NS) injection 20 mL IV once as needed for line care post lab draw		
	☐ Heparin, porcine (PF) 100 unit/mL flush 5 mL IV as needed for line care, for de-access		
	<ul> <li>☑ Alteplase (Cathflo) injection 2 mg intra-catheter as needed for clearing central line catheter.</li> </ul>		
	Reconstitute with 2.2 mL sterile water for injection to the vial; let the vial stand undisturbed		
	to allow large bubbles to dissipate. Mix by gently swirling until completely dissolved		
	(complete dissolution should occur within 3 minutes); do not shake. Final concentration:		
	1mg/mL. Instill medication in non-functional lumen. Do not use lumen while dwelling. Allow		
	to dwell 30 minutes and check for patency by drawing back on lumen for blood return. If line		
	is still not patent, allow medication to dwell an additional 90 minutes. Dwell time not to		
	exceed 120 minutes. Use second dose of Alteplase (Cathflo) if catheter not patent after 120		
	minutes. If the catheter is functional, aspirate and waste the medication and residual clot		
	prior to flushing line.		
	☐ Access and use PICC Central Line/CVAD as needed and confirm patency		
	□ Change PICC line dressing weekly and as needed		
	oxtimes Sodium chloride 0.9% (NS) injection 10 mL IV as needed for line care before and after		
	medication administration, at discharge, and at de-access		
	☑ Sodium chloride 0.9% (NS) injection 20 mL IV once as needed for line care post lab draw		
	☑ Alteplase (Cathflo) injection 2 mg intra-catheter as needed for clearing central line catheter
