

## Peace Harbor Medical Center Outpatient Infusion Service Request

Phone: (541) 902-6019 Fax: (541) 902-1649

Thank you for selecting our infusion services team to care for your patient. Please provide ALL information listed below to ensure that we can process orders and schedule your patient for treatment without delay.

# Part A- Patient scheduling and contact information: Patient Name (Last, First): \_\_\_\_\_\_\_Date of Birth: \_\_\_\_\_\_ Patient Contact Information and Phone Number (s): Ordering Provider Name (Print): Provider Clinic or Service Address: Clinic or Service Phone Number: \_\_\_\_\_\_ Clinic or Service Fax Number: \_\_\_\_\_\_ Diagnosis (include ICD 10 codes): Medication and Service Requested- list J-Code/ CPT code if known: Date Service is Requested to Begin: \_\_\_\_\_\_ Date Service is Expected to End: \_\_\_\_ Order will expire 1 year from date of provider signature unless "date service is expected to end" is earlier. Part B- Insurance and Prior Authorization. Any non-PeaceHealth provider must obtain prior authorization prior to service. Attach a copy of authorization documentation received from insurance payer when submitting orders. Insurance (Payer) Company: Prior Authorization Number and Conditions: Prior Authorization Expiration Date: Insurance (Payer) Contact Phone Number: Part C- Elements needed to guide medication therapy are included with request for service: Orders and instruction (use the PeaceHealth approved ordering form if you are not a PeaceHealth provider) are complete and include provider signature at the bottom of each page. Check the boxes of ALL orders you would like to activate. For blood products, PeaceHealth Blood and Transfusion Consent form is signed and dated by the provider and the patient. If information is located outside of PeaceHealth's electronic medical record system attach the following: A list of current medications reconciled by patient provider is available and includes a list of known allergies. Recent progress notes from ordering provider. A copy of relevant laboratory results and other appropriate supporting documentation. IMPORTANT MESSAGE TO PROVIDERS: To reduce delays in treatment and added phone calls, you may participate to utilize PeaceHealth preferred medication formulary options by signing this document. A clinical pharmacist will adjust orders to align with PeaceHealth medical staff approved medication formulary options, policies, and procedures. I agree to utilize PeaceHealth preferred medication formulary options, policies and procedures that have been authorized by PeaceHealth Medical Staff. This agreement will be issued for the duration of active orders contained within this treatment plan. PROVIDER SIGNATURE: \_\_\_\_\_ DATE: \_\_\_\_\_ TIME:\_\_\_\_

### Ferric Derisomaltose (Monoferric) Outpatient Infusion Therapy Plan

Heading	Boxed Orders Are Initiated by Default Unless Crossed Out by Practitioner. All <u>Boxed Orders</u> Require Practitioner Check to be Initiated  Content			
For Admission to	<b>Provider Instruction</b> – Review information below and address requirements for admission to service:			
Service	<ul> <li>Provider to order CBC with automated differential, iron and ferritin prior to patient starting treatment.</li> </ul>			
Supportive Care	Choose one of the following:			
	Patients weighing greater than or equal to 50 kg:			
	☐ Ferric derisomaltose (Monoferric) 1000 mg IVPB infused over 20 minutes			
	Patients weighing less than 50 kg:			
	☐ Ferric derisomaltose (Monoferric) 20 mg/kg IVPB infused over 20 minutes			
	⊠ Sodium chloride 0.9% (NS) continuous infusion at 100 mL/hour IV as needed for IV site			
	discomfort. Run concurrent with iron infusions as needed.			
Nursing Orders	☐ Monitor patient for signs and symptoms of hypersensitivity during infusion and for at least 30			
	minutes after infusion. Hypersensitivity symptoms may include anaphylaxis, flushing, dyspnea, tachycardia, and increased blood pressure.			
	Monitor patient for MILD hypersensitivity reactions and initiate interventions as indicated: Mild Hypersensitivity Symptoms: Metallic taste, chest tightening, back tightening, increased anxiety, flushing (normothermic), dizziness, nausea, headache, diaphoresis (normothermic), palpitations, fishbane reaction (transient flushing, chest and back tightening, joint pain).			
	Step 1: STOP infusion, monitor vital signs and O2 every 5 minutes (until symptoms resolve or for a minimum of 15 minutes).			
	Step 2: Administer Methylprednisolone as ordered.			
	Step 3: Resume infusion at reduced rate of 50% original rate.			
	Step 4: Observe for 1 hour following infusion completion.			
	Step 5: Notify provider of adverse reaction.			
	☑ Monitor patient for MODERATE hypersensitivity reactions and initiate intervention as indicated:			
	Moderate Hypersensitivity Symptoms: Mild symptoms PLUS chest discomfort (pressure), shortness of breath, hypo/hypertension (greater than or equal to a 20-point change in SBP), increased temperature (greater than or equal to 38 C or 100.4 F) with rigors, urticaria, new onset or progressive edema			
	☑ Monitor for ANAPHYLAXIS: Mild and moderate symptoms PLUS hypo/hypertension (greater than or equal to a 40-point change in SBP), shortness of breath (RR greater than 20, O2 sat less than 90%) with wheezing or stridor, swelling of face/tongue, corneal edema, or periorbital edema.			
	Step 1: STOP infusion and activate rapid response. Step 2: Monitor vital signs and O2 sat every 5 minutes, place patient in left lateral tilt (if pregnant).			
	Step 3: Administer Methylprednisolone as ordered.			
	Step 4: Administer Famotidine as ordered.			
	Step 5: Administer Epinephrine as ordered (ONLY FOR ANAPHYLAXIS).			
	Step 6: Transfer patient to main Emergency Department as soon as possible.

Nursing IV Access	Select the most appropriate option below:				
and Maintenance					
	☐ Access and use NON-PICC Central Line/CVAD as needed and confirm patency				
	☑ Initiate Central Line (Non-PICC) maintenance protocol				
	<ul> <li>☑ Sodium chloride 0.9% (NS) injection 10 mL IV as needed for line care before and after medication administration, at discharge, and at de-access.</li> <li>☑ Sodium chloride 0.9% (NS) injection 20 mL IV once as needed for line care post lab draw</li> <li>☑ Heparin, porcine (PF) 100 unit/mL flush 5 mL IV as needed for line care, for de-access</li> <li>☑ Alteplase (Cathflo) injection 2 mg intra-catheter once as needed x 2 doses. For clearing centra</li> </ul>				
	line catheter. Reconstitute with 2.2 mL Sterile Water to the vial; let the vial stand undisturbed				
	to allow large bubbles to dissipate. Mix by gently swirling until completely dissolved (complete				
	dissolution should occur within 3 minutes); do not shake. Final concentration: 1 mg/mL. Instill				
	medication in non-functional lumen. Do not use lumen while dwelling. Allow to dwell 30				
	minutes and check for patency by drawing back on lumen for blood return. If line is still not patent, allow medication to dwell an additional 90 minutes. Dwell time not to exceed 120 min.				
	Use second dose of Alteplase (Cathflo) if catheter not patent after 120 min. If the catheter is				
	functional, aspirate and waste the medication and residual clot prior to flushing the line.  Access and use PICC Central Line/CVAD as needed and confirm patency				
	☐ Change PICC line dressing weekly and as needed				
	medication administration.				
	Sodium chloride 0.9% (NS) injection 20 mL IV once as needed for line care post lab draw				
	☑ Alteplase (Cathflo) injection 2 mg intra-catheter once as needed x 2 doses. For clearing central				
	line catheter. Reconstitute with 2.2 mL Sterile Water to the vial; let the vial stand undisturbed				
	to allow large bubbles to dissipate. Mix by gently swirling until completely dissolved (complete				
	dissolution should occur within 3 minutes); do not shake. Final concentration: 1 mg/mL. Instill				
	medication in non-functional lumen. Do not use lumen while dwelling. Allow to dwell 30				
	minutes and check for patency by drawing back on lumen for blood return. If line is still not				
	patent, allow medication to dwell an additional 90 minutes. Dwell time not to exceed 120 min.				
	Use second dose of Alteplase (Cathflo) if catheter not patent after 120 min. If the catheter is				
	functional, aspirate and waste the medication and residual clot prior to flushing the line.

#### Ferric Derisomaltose (Monoferric) Outpatient Infusion Therapy Plan

All Pre-Selected Boxed Orders Are Initiated by Default Unless Crossed Out by Practitioner. All Boxed Orders Require Practitioner Check to be Initiated.

Heading	Content				
Emergency	If patient has symptoms of anaphylaxis (wheezing, dyspnea, hypotension, angioedema, chest pain,				
Medications	or tongue swelling), discontinue infusion and initiate standard emergency response procedures.  Standard Emergency Medications:				
	☐ <b>Albuterol 90 mcg/actuation</b> inhaler 2 puffs once as needed for wheezing, shortness of breath				
	associated with infusion reaction and notify provider. Administer with a spacer if available.				
	☑ MethylPREDNISolone (Solu-Medrol) injection 125 mg IV once as needed for shortness of breath				
	for continued symptoms of mild to moderate drug reactions (flushing, dizziness, headache,				
	diaphoresis, fever, palpitations, chest discomfort, blood pressure changes (greater than or equal				
	to 20 points in SBP), nausea, urticaria, chills, pruritis) that worsen or persist after administration				
	of diphenhydramine (Benadryl) and notify provider.				
	☑ Famotidine (Pepcid) injection 20 mg IV once as needed for continued symptoms of moderate				
	hypersensitivity reactions (flushing, dizziness, headache, diaphoresis, fever, palpitations, chest				
	discomfort, blood pressure changes (greater than or equal to 20 points in SBP), nausea, urticaria,				
	chills, pruritis) that worsen or persist, and notify provider.				
	☑ EPINEPHrine (Adrenalin) injection 0.5 mg IM once as needed for severe drug reaction (flushing,				
	dizziness, headache, diaphoresis, fever, palpitations, chest discomfort plus blood pressure				
	changes (greater than or equal to 40 points in SBP), shortness of breath with wheezing and 02				
	Sat less than 90%, and notify provider.
