Progress & Orders

Potassium Replacement Outpatient Infusion Therapy Plan

All Pre-Selected Boxed Orders Are Initiated by Default Unless Crossed Out by Practitioner. All Boxed Orders Require Practitioner Check to be Initiated.

Heading	Content				
Supportive Care	Choose one of the following:				
	☐ Potassium chloride mEq IV once				
	☐ Potassium chloride IV weekly based on lab value. Check lab results prior to releasing this order:				
	 For potassium serum level 3.2-3.4 mmol/L, give 20 mEq potassium chloride IV 				
	 For potassium serum level 2.5-3.1 mmol/L, give 40 mEq potassium chloride IV 				
	For potassium serum level less than 2.5 mmol/L, start 40 mEq potassium chloride IV and call				
	provider for additional orders.				
	☐ OTHER: Potassium chloride IV(frequency) based on lab value. Check lab results prior				
	to releasing this order:				
	For potassium serum level, give mEq potassium chloride IV				
Labs	□ Serum potassium level prior to each treatment				
	☐ Treatment lab instructions – Provider approves to release and draw labs 2 days pre and post this				
	planned treatment date.				
Nursing Orders	☐ Nursing communication – Check serum potassium and infuse ordered dose of medication based on				
	lab values as indicated with provider order.				
Nursing IV Access	Select the most appropriate option below:				
and Maintenance					
	☑ Sodium chloride 0.9% (NS) flush 10 mL IV once as needed for line care				
	☐ Access and use NON-PICC Central Line/CVAD as needed and confirm patency				
	☐ Initiate Central Line (Non-PICC) maintenance protocol				
	☑ Sodium chloride 0.9% (NS) injection 10 mL IV as needed for line care before and after				
	medication administration, at discharge, and at de-access				
	☑ Sodium chloride 0.9% (NS) injection 20 mL IV once as needed for line care post lab draw				
	☐ Heparin, porcine (PF) 100 unit/mL flush 5 mL IV as needed for line care, for de-access				
	☑ Alteplase (Cathflo) injection 2 mg intra-catheter as needed for clearing central line catheter.				
	Reconstitute with 2.2 mL sterile water for injection to the vial; let the vial stand undisturbed to				
	allow large bubbles to dissipate. Mix by gently swirling until completely dissolved (complete				
	dissolution should occur within 3 minutes); do not shake. Final concentration: 1 mg/mL. Instill				
	medication in non-functional lumen. Do not use lumen while dwelling. Allow to dwell 30				
	minutes and check for patency by drawing back on lumen for blood return. If line is still not				
	patent, allow medication to dwell an additional 90 minutes. Dwell time not to exceed 120				
	minutes. Use second dose of Alteplase (Cathflo) if catheter not patent after 120 minutes. If the				
	catheter is functional, aspirate and waste the medication and residual clot prior to flushing the				
	line.				

Practitioner Signature:	Date of Order:	Time:
Final page of orders must include signature of the ordering practitioner, date, and time.		

Date of Revision: 9/16/25
