Outpatient Infusion Service Request

Phone: (541) 902-6019 Fax: (541) 902-1649

Thank you for selecting our infusion services team to care for your patient. Please provide ALL information listed below to ensure that we can process orders and schedule your patient for treatment without delay.

Part A- Patient scheduling and contact information:

Patient Name (Last, First): _____ Date of Birth: _____

Patient Contact Information and Phone Number(s): _____

Ordering Provider Name (Print): _____

Provider Clinic or Service Address: _____

Clinic or Service Phone Number: _____ Clinic or Service Fax Number: _____

Diagnosis (include ICD 10 codes): _____

Medication and Service Requested - list J-Code/CPT code if known: _____

Date Service is Requested to Begin: _____ **Date Service is Expected to End**: _____

Order will expire 1 year from date of provider signature unless "date service is expected to end" is earlier.

Part B- Insurance and Prior Authorization. Any non-PeaceHealth provider must obtain prior authorization prior to service. *Attach a copy of authorization documentation received from insurance payer when submitting orders.*

Insurance (Payer) Company: _____

Prior Authorization Number and Conditions: _____

Prior Authorization Expiration Date: _____

Insurance (Payer) Contact Phone Number: _____

Part C- Elements needed to guide medication therapy are included with request for service:

☐ Orders and instruction (use the PeaceHealth approved ordering form if you are not a PeaceHealth provider) are complete and include provider signature at the bottom of each page. Check the boxes of ALL orders you would like to activate.

☐ For blood products, PeaceHealth Blood and Transfusion Consent form is signed and dated by the provider and the patient.

If information is located outside of PeaceHealth's electronic medical record system attach the following:

☐ A list of current medications reconciled by patient provider is available and includes a list of known allergies.

☐ Recent progress notes from ordering provider.

☐ A copy of relevant laboratory results and other appropriate supporting documentation.

IMPORTANT MESSAGE TO PROVIDERS: To reduce delays in treatment and added phone calls, you may participate to utilize PeaceHealth preferred medication formulary options by signing this document. A clinical pharmacist will adjust orders to align with PeaceHealth medical staff approved medication formulary options, policies, and procedures.

I agree to utilize PeaceHealth preferred medication formulary options, policies and procedures that have been authorized by PeaceHealth Medical Staff. This agreement will be issued for the duration of active orders contained within this treatment plan.

For Admission To Service	**Provider Instruction –** Review information below and address requirements for admission to service: 1. Provider documentation must include the results of a dual-energy X-ray absorptiometry (DEXA) to support the indication of osteoporosis (T score -2.5 or below) or osteopenia (T score -1.0 to -2.4) treatment with denosumab. Select one indication from the list below to indicate reason for treatment (**selection is required**). If your patient does not meet one of the following criteria, denosumab is not indicated per CMS guidelines. ☐ Postmenopausal women with osteoporosis (T score < -2.5) at high risk of fracture (10 year probability of a major osteoporotic related fracture of > 20% or hip fracture > 3%) ☐ Men with osteoporosis (T score < -2.5) at high risk for fracture (10 year probability of a major osteoporotic related fracture of > 20% or hip fracture > 3%) ☐ Glucocorticoid induced osteoporosis (T score < -2.5) in men and women at high risk for fracture (10 year probability of a major osteoporotic related fracture of > 20% or hip fracture > 3%) ☐ Men at high risk for fracture (10 year probability of a major osteoporotic related fracture of > 20% or hip fracture > 3%) receiving androgen deprivation therapy for nonmetastatic prostate cancer ☐ Women receiving adjuvant aromatase inhibitor therapy for breast cancer at high risk for fracture (10 year probability of a major osteoporotic related fracture of > 20% or hip fracture > 3%) ☐ Patients with osteopenia (T score -1 to -2.4) and a history of fragility fracture ☐ Patient with a high fracture risk assessment score (10 year probability of a major osteoporotic related fracture of > 20% or hip fracture > 3%) 2. If patient new to denosumab therapy, must have baseline labs completed prior to treatment. For subsequent treatment, use corrected calcium within predetermined timeframe before treatment. Select a timeframe within the lab order. • **WITHIN 7 MONTHS –** May be appropriate for individuals who do not have impaired renal function or elevated risk for hypocalcemia (i.e. eGFR of 60 or higher), no history of malabsorptive conditions or malabsorptive procedures such as gastric bypass, or history of hypoparathyroidism, and who are regularly obtaining stable intake of calcium and vitamin D. • **WITHIN 3 MONTHS –** May be appropriate for individuals who may have mild-to-moderate impairment in renal function (eGFR 45-59) or history of malabsorption but with stable supplementation and nutrition. • **WITHIN 1 MONTH –** May be appropriate for individuals who have impaired renal function (eGFR of less than 45) or concerns about elevated risk for hypocalcemia (known issues with nutrition or intestinal absorption), or who may be at elevated risk for progression in renal impairment which would also increase risk of severe hypocalcemia due to denosumab treatment. More frequent monitoring of calcium may be needed for individuals with more advanced CKD. For individuals with eGFR less than 30, denosumab should be introduced only with caution due to risk of hypocalcemia; evaluate for the presence of CKD mineral and bone disorder (CKD-MBD)/obtain guidance of a specialist in metabolic bone disease/osteoporosis before starting therapy. 3. Provider to ensure patient has had satisfactory dental exam prior to start of denosumab. 4. Review FDA Risk Evaluation and Mitigation Strategies requirements and ensure all criteria are met.
