Cell: 541-510-5602
• I have no relevant financial disclosures
ICD-10

- October 1\textsuperscript{st} is the transition date
- Replaces ICD-9 which is about 30 years old
- There is a significant increase in number of codes

- Increased specificity will influence:
  - Public health issues and research decisions
  - VBP and PFP and national provider profiling
What are the primary changes?

- Laterality
- Episode of care (initial, subsequent, sequela)
- Trimester of pregnancy or weeks gestation
- Detail of disease anatomy
- Clinical guidance scales
- Post procedural complications
What conditions are most affected by the increase in number of codes?

- Fractures
- Poisoning and toxic effects
- Pregnancy related conditions
What do I need to include in my documentation?

• Who
• What
• Where
• When
• Why
• How
• How much
Obstetrics: co-morbid conditions

• Specify whether condition is pregnancy related
  – Nausea with/without vomiting

• Specify if condition present before pregnancy
  – Pre-existing diabetes (type 1 or 2)
  – Gestational diabetes (diet or insulin controlled)
ICD-10 obstetrics documentation

• Document anesthesia complications
• Document obstetric complications
  – low weight, retained IUD, or gestational herpes
• Denote which fetus is affected by a condition or complication in multiple gestation pregnancies
# Pregnancy Classification System

<table>
<thead>
<tr>
<th>ICD-9 OLD</th>
<th>ICD-10 NEW</th>
</tr>
</thead>
<tbody>
<tr>
<td>Antepartum</td>
<td>Pregnancy</td>
</tr>
<tr>
<td>Delivered</td>
<td>Childbirth</td>
</tr>
<tr>
<td>Postpartum</td>
<td>Puerperium</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ICD-10 NEW</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st trimester</td>
</tr>
<tr>
<td>2nd trimester</td>
</tr>
<tr>
<td>3rd trimester</td>
</tr>
</tbody>
</table>
Abortion definition change

• Timeframe for a missed abortion (vs. fetal death) has changed from 22 to 20 weeks
• An elective abortion is now described as elective termination of pregnancy
ICD-10 gynecology documentation

• Laterality
  – Left, right, bilateral

• Etiology
  – Causative organism of infection

• Chronicity
  – Acute or subacute or chronic
PCS for inpatient procedures

• Only used for facility billing of inpatient procedures
• Coders need to build a 7 component code

• Root operation describes intent of the procedure
• Approach – open, laparoscopic, via natural opening
• Device
General comments about documentation

• It is ok to use a sign/symptom when you don’t know the diagnosis
• Include the cause and the outcome
• It is ok to use ‘unspecified’ when you don’t know details
• Avoid eponyms
• Able to code for things not done
  – Refusing immunization
  – Underdosing medications
Is it alright to use ‘unspecified’?

- Acceptable to use when more specific clinical information about a patient’s condition is not known
- Use the most specific diagnosis term that is supported by documentation and clinical knowledge
Medical Diagnoses

• Tobacco history
  – Exposure/history of/dependence/use

• Depression
  – Single episode/recurrent and mild/moderate/severe

• Anemia
  – Acute/chronic and specify cause
ELECTRONIC HEALTH RECORDS

• Centricity Enterprise
  – problem list terms will be mapped to ICD-10 codes

• CareConnect Ambulatory
  – already ICD-10 compliant with diagnosis calculator

• CareConnect Inpatient
  – includes tools that assist in choosing ICD-10 terms
CMS website includes:

- Common OB/GYN codes
- Documentation primer re changes
- Clinical scenarios
- Education resources including webcasts
