

### **Donor Breast Milk**

Donor breast milk is the lifeline that so many of our premature babies depend on. It is more easily digested and protects against infections and potentially fatal intestinal problems.

- Average cost of donor milk per baby per day - \$14.55

### **Infant Blood Pressure Cuff with Custom Sizes**

One-size does not fit all, especially when babies are measured in grams rather than pounds, so blood pressure cuffs must have the perfect fit. This critical lifesaving device is a staple in NICU's nationwide and is specifically designed to the smallest of patients.

- Pack of five cuffs - \$45

### **Preemie Extra-Small Diapers**

Diapers created for the tiniest babies are often smaller than the palm of your hand. Special care has been put into designing these tiny diapers.

- Engineered soft fabrics for patient's delicate skin
- Sizes begin for kinds under 800 grams
- Case price (360/case) - \$170

### Single Port Laparoscope

Used by our Pediatric Surgeon, Dr. Zallen, using minimally invasive techniques to help kids recover faster.

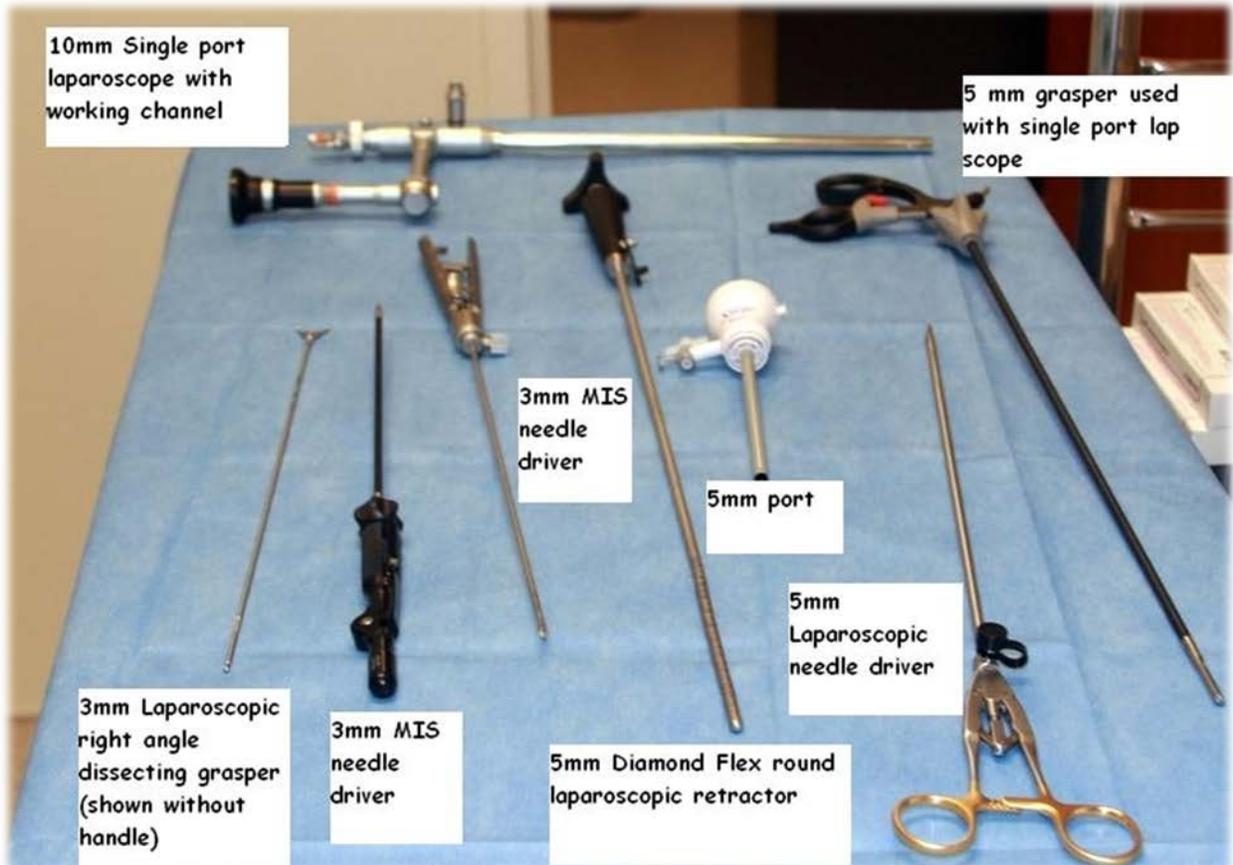

- Price - \$6,000

### Other tools used by our Pediatric Surgeon

Used by our Pediatric Surgeon, Dr. Zallen, using minimally invasive techniques to help kids recover faster.

- Price in total: \$40,000

### **Bubble CPAP System**

Respiratory support system for premature babies. The pressure of the bubbles provides a lung protective, safe and effective method of respiratory support to spontaneously breathing babies.

- Price : \$2,800

### **NICU Ventilator**

Ventilation support for our incredibly small babies. This new equipment automatically adjusts with the baby so caregivers do not have to intubate over and over again. This in turn creates better outcomes and reduces death rates.

- Price : \$35,000

### **Isolette**

An isolette simulates the womb, and is used with highly acuite infants who need more time and help to develop and grow.

- Price : \$20,000

### **Baby CPR Manequin**

Manequines provide healthcare professionals the ability to recognize several life-threatening emergencies, provide CPR, and relieve choking in a safe, timely and effective manner.

- Price : \$2,155

### **NICU Transport Equipment Supplies**

Mattresses, covers and positioning devices to hold infants heads stable during the ride. Any subtle movements can be life threatening to these babies.

- Price : \$1,725
