Neonatal Intensive Care Unit Physicians

The NICU Physician Team welcomes you and your baby(s)!

YOUR CARE TEAM

During your baby’s stay at the NICU at Sacred Heart Medical Center, a group of neonatologists will oversee your baby’s care. We are doctors who specialize in caring for infants who are born early or with medical complications. Each neonatologist maintains certification in neonatal-perinatal medicine, and is uniquely qualified to care for the special needs of your baby, with support from our highly qualified NICU care team.

Neonatologists are available 24 hours per day. A physician examines your baby daily and makes an effort to contact you, usually in the morning, regarding your baby’s condition. Other pediatric specialists may see your baby, depending on your baby’s needs.

The State of Oregon has designated the NICU at Sacred Heart a Level III unit. That means we have the expertise and state-of-the-art technology to deliver excellent care to newborns. Your baby’s health is truly a team effort, and you and your family are very important members of that team. Together, we can help your baby thrive and grow.
