Requirements/Competencies for Procedural Sedation Level One Moderate Sedation Privileges

This process is for practitioners to request level one moderate sedation privileges, in lieu of required case volume criteria. This does not apply to level two deep sedation privilege requests.

1. Pick up privilege request form from Medical Staff Services.

2. Review Educational materials at the following website on the PeaceHealth Southwest web site at:

   http://www.peacehealth.org/about-peacehealth/medical-professionals/vancouver/cme-opportunities/Pages/Default.aspx

3. Under the Procedural Sedation Education Course heading, read section tabs two through six:

   a. PHSW Procedural Sedation Policy and Procedures (tab 2)
   b. Practice Guidelines for Sedation and Analgesia by Non-Anesthesiologists; Airway Management and Nonbarbiturate Intravenous Anesthetics (tab 3)
   c. Drugs used at PHSW in Procedural Sedation (tab 4)
   d. “Monitoring During and After Intravenous Conscious Sedation,” by JoAnne Oh, MD (tab 5)
   e. “Complications in IVCS and Management,” by Glynne D. Stanley, MB,ChB, FRCA (tab 6)

4. Complete the attestation page and post-test (tab 7) and correct with answer key (tab 8).

5. Return privilege form, attestation for course completion and post-test to Medical Staff Services.

Objectives of this Category 2 CME activity:
At the end of this learning package, non-anesthesia practitioners should be able to:

1. Follow the PHSW Policy and Procedure on Procedural Sedation.
2. Appropriately optimize patient’s condition; plan for any special needs such as having a language translator present; minimize patient anxiety through education; obtain an informed consent after a review of risks, benefits, and options; and develop an appropriate intravenous procedural sedation plan.
3. Adequately monitor the patient’s physiological parameters; detect problems during IVCS.
4. Appropriately manage unanticipated events.
5. Appropriately use reversal agents.
6. Articulate appropriate discharge criteria.
7. Meet the criteria for PHSW privileges in one level of procedural sedation.
