PeaceHealth Medical Group Pulmonary COPD Clinic

PeaceHealth Medical Group Pulmonary COPD (Chronic Obstructive Pulmonary Disease) clinic has recently opened. The goal of the clinic is to assist with the management of patients with COPD and reduce the risk of hospitalization. This will be accomplished via development of a COPD action plan, directed testing, pulmonary rehab, and patient education and counseling. Patients referred to this clinic may receive the following:

- Inhaler education and training
- Alpha-1 antitrypsin deficiency screening
- Pulmonary Function Test (PFT)
- Referral to Pulmonary Rehab if needed
- Screening for obstructive sleep apnea
- Screening for low oxygen levels
- Smoking cessation guidance and treatment
- Evaluation for allergy triggers and reflux disease

To refer a patient:
