

The COVID-19 crisis is changing rapidly, and we are deeply grateful for the many offers of assistance. In order to make the most of the community's offers, it would help us immensely if you could only drop off what's on our list in the week it's requested.

If you own a manufacturing business and can make supplies in large quantities, please contact: Meghan McCarthy, System Director of Community Health at MMcCarthy3@peacehealth.org.

If you are a community member and would like to donate a small quantity of supplies, please refer to the [instructions for your closest hospital](#). Thank you!

PLEASE NOTE ALL ITEMS MUST BE NEW IN SEALED PACKAGING.

(Pictures are just examples. We should be able to use all style, sizes or color.)
